

SECURITY ENHANCED Daily School Bus INSPECTIONS

Daily school bus safety inspections are an industry standard. Drivers are familiar with pre- and post-trip inspections that aid in maintaining safe vehicle operation. These inspections commonly focus on mechanical components from a safety and functionality perspective.

For a more robust daily inspection, consider ADDING and/or MODIFYING items with a security focus.

Always be aware of:

- Doors that feel heavier than normal when opening and closing
- Missing screws or rivets on exterior surfaces
- Recently applied or altered vehicle markings
- Inconsistent sounds when tapping on vehicle walls
- Unusual items in storage areas or other compartments
- Modified, thick, or repaired flooring, ceiling, or roof
- Altered interior or exterior lighting
- Seats with lumps, bulges, or damaged upholstery
- Unusual and/or unexplained odors
