

Additional Parts and Accessories that May Affect Safe Operation

In addition to the 49 CFR 396.11 inspection requirements that include checking service brakes (air brake system), parking brake, steering mechanism, lighting devices, tires, horn, windshield wipers, mirrors, wheels, and emergency equipment, **other parts and accessories may affect safe operation.**

During any vehicle inspection, be aware of the condition of:

- Frame and frame assemblies
- Suspension systems
- Axles and attaching parts
- Steering systems
